Abstract

A clear and well-documented LATEX document is presented as an article formatted for publication by CEUR-WS in a conference proceedings. Based on the "ceurart" document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

Keywords

LaTeX class, paper template, paper formatting, CEUR-WS

1. Introduction and Motivations

Description of the task, short introduction and motivation for the proposed approach.

2. Related Work

Short description of existing approaches for the problem or task.

3. Proposed Approach

3.1. Description of the solution and dataset

Description of the strategy or solution, dataset, including main technical details of implementation (e.g. used ChatGPT 3.5). The details of the description must allow to replicate the approach. You can use subsections to structure the description (not mandatory).

---

[*]You can use this document as the template for preparing your publication. We recommend using the latest version of the ceurart style.

[*]Corresponding author.
